ESSENCE OF HIMALAYA

The ultimate healing source

Himalayan Salt is a complete organic salt on Earth containing 84 trace minerals and elements that match the human body. Formerly one of our primal oceans, Himalayan Salt underwent extreme pressures during the formation of the Himalayan Mountains. This resulted in a perfect crystalline structure. Himalayan salt is basically a type of sea salt that was never polluted and never processed to strip away its vital components. It is truly "nature's gift" to humans.

SALT LAMPS

Salt crystal lamps work as a natural air purifier; killing bacteria, removing dust, allergens, smoke, odors, and mold spores. They never get dirty or dusty. They help you breathe and sleep better. They are a beautiful addition to any room decor and function as a perfect night-light, creating a soothing and tranquil atmosphere.

SALT LAMPS

When the salt crystal rock is lit and heats up, a reaction occurs with the crystal, causing it to emit negative ions. These ions clean the air and relieve symptoms of Asthma, Allergies, Migraines, and Snoring, while neutralizing all odors. They also offset the negative effects of electronic smog produced by computers, televisions, and other electronic devices.

Salt lamps can improve your home and environment. They belong in bedrooms, living rooms, dining rooms, hallways, near televisions, meditation rooms, computers and around smokers. Use these beautiful lamps in offices to reduce fatigue and beautify your work area; you will find yourself refreshed and your concentration will be improved by the effects of the negative ions.

TEA LIGHT HOLDERS

Tea lights are small candles that give off a soft glow of light. The name comes from their original use of warming a teapot. Tea-light candles can be used alone or, often more effectively, in groups. Whether used for decoration, atmosphere, or more practical purposes, tea lights are an inexpensive way to bring natural light to a room.

TEA LIGHT HOLDERS

Tea lights are great for Feng Shui, smaller spaces and even traveling.

Crafted from our beautiful Himalayan salt crystals, our salt candle holder will add a warmth, feel-good ambiance and healthy ions into any space.

BATH SALT

Whether you have sore or tired feet from standing all day, or a stiff back from working at your desk, a nice long soak in a tub sprinkled with Himalayan bath salt releases muscle tension and improves common irritations such as minor rashes and calluses on feet.

Soften and re-mineralize your skin while balancing its pH with the all-natural salt bar from the Himalayas. The chemical composition of the salt also destroys the odor-causing bacteria living on your skin.

EDIBLE SALT

Himalayan Salt has remained locked under the Himalayas for millions of years, protected from modern pollutants and toxins. Often referred as "the world's purest salt", it is the purest, cleanest, unprocessed, complete salt available. It contains no environmental pollutants or anti-caking agents and there are more than 84 minerals & elements found in your body.

CULINARY

Due to its denser form, caused by the 84+ minerals contained within the salt and the tectonic pressure which created it, Himalayan Salt has the ability to be fashioned into blocks, for grilling, chilling and serving food, as well as serve ware such as bowls, glasses and plates.

DECOR

Using special salt mixes, builders in countries from Bolivia to Poland have been building using sodium chloride for centuries.

Humans have a long relationship with salt and it has been called "the divine substance." Adding salt blocks or a salt wall in your home can not only enrich the decor but also cleanse the atmosphere.

ANIMAL LICK SALT

Himalayan rock salt licks contain upto 84 minerals & trace elements and are extremely beneficial for the growth and overall health of all farm animals, big game animals and pets. Salt licks are used for Horses, Cattle, Farm animals, pets and for attracting various wild animals like Whitetail Deer, Mule Deer, Elk, Moose and Antelope etc.

LICK SALT

Himalayan rock salt licks are literally 'rock hard', this means that animals are unable to bite chunks off the block, a problem that can occur with the softer 'pressed' salt licks. These licks are also much more weather resistant, which means they can be safely left outside in the field for Farm animals to 'self dose'. Our experience has shown that Farm animals and pets prefer these to other salt licks. Farmers have historically provided salt licks for their cattle, horses, and other herbivores to encourage healthy growth and development.

A salt lick is a deposit of mineral salts used by animals to supplement their nutrition, ensuring that they get enough minerals in their diet. A wide assortment of animals, primarily herbivores, use salt licks to get essential nutrients like calcium, magnesium, sodium, and zinc.

HIMALAYAN PINK SALT

This naturally pink and pure mineral substance (the cleanest form found anywhere in the world), gathered from the Himalayan Mountains has been used for thousands of years as a natural medicine and therapeutic cure.

Because it was originally sourced only from a handful of spots tucked away in the Himalayan mountain range, it became immensely valuable – and continues to be valuable today. Himalayan salt is effectively used as an all-natural remedy.

Core Benefits

There are many major benefits of using this amazing product of nature on a regular basis. Few of the benefits listed below will provide us with a “foundational education” as to why it is so valuable and sought after, as a natural remedy!

Source of Minerals And Bio Compounds

Pink salt is widely regarded as the cleanest, purest, and most “mineral dense” version available on planet, partly due to the fact that it is only found in the Himalayan mountain range that those who sell it do not “cut it” with lesser compounds. Therefore Pink salt is a direct source of 84 minerals and other bio compounds that the human body needs.

Detoxification of the Human Body

Water is of the utmost importance to detoxify the human body, but salt is the “vehicle” that allows you to transfer toxins from healthy cells to the bloodstream – pushing them out of your systems.

Lowering Blood Pressure

Pink version salt is absorbed into the bloodstream more effectively than regular salt.

Having the right amount of salt in the body helps increase blood circulation while lowering blood pressure at the same time.

Relaxed Mind and Body

Loss of electrolytes and salt in the human body causes fatigue and dizziness. The unique composition of pink salt’s ability to be absorbed into the bloodstream is much more effective and efficient than the traditional salts – allowing to restore and replenish energy swiftly.

Sinus Issues And Respiratory Conditions

As pink crystals emit negative ions, when mixed with hot water and dissolved, it can clear up sinus issues and improve any respiratory conditions (including asthma).

Improved Sleep

When mind is at ease and muscles are relaxed, sleep becomes healthier and more regular.

Supplementing with pink salt can help improve the condition of human body and mind providing everything the body needs to replenish and restore overnight.

Balanced Body Acidity and Alkaline Levels

Preparing a pink salt bath (about 2 pounds of this mineral in a single warm bath) can help create a true balance between your acidity and alkaline levels in your organism.

Healed Arteries

This natural product is tremendously effective in clearing up arteries and improving blood circulation across the board – which will eliminate the potential for varicose or “spider veins” from ever popping up in the first place.
